(Mobile library) Contemporary Theory of Conservation

## **Contemporary Theory of Conservation**

**Salvador Munoz-Vinas : Contemporary Theory of Conservation** before purchasing it in order to gage whether or not it would be worth my time, and all praised Contemporary Theory of Conservation:

1 of 1 people found the following review helpful. review of the book on conservation theoryBy NirtanThis book should be part of any conservator's or even curator's shelf. It reads like a thriller as it raises questions and offers answers to many issues that laid buried for decades and caused much frustration to museum professionals. It calls for open-mindedness, dialogue, flexibility, cooperation, something we all have to work on more.2 of 2 people found the

following review helpful. Excelent!By SHEILA RECEPTExcellent book on the conservation and restoration works. Written in clear and accessible language. I recommend this book for who loves art.1 of 2 people found the following review helpful. very good bookBy M. GusmaoThis is a very good review and update on conservation, a must have for urbanists and conservasionists.

Classical theories of conservation are well known in the heritage community, but in the last two decades thinking has shifted, and classical theory has faced increasing criticism. Contemporary Theory of Conservation brings together current ideas in conservation theory, presenting a structured, coherent analysis of the subject for the first time. This engaging and readable text is split into 3 parts. The first, Fundamentals of conservation, addresses the identity of conservation itself, and problems arising when classical conservation theories are applied. The second part, Questioning classical theories, delves deeper into the criticism of classical ideas such as reversibility. This leads on to the creation of new paradigms such as sustainability, which are covered in the final part of the book, Conservation ethics.

About the AuthorDr Salvador Munoz Vinas was born in 1963 in Valencia, Spain, where he continues to live and work. He is currently Professor of the Conservation Department at the Polytechnical University of Valencia (UPV), head of the paper and document group of the Heritage Conservation Institute of the UPV, and Director of the UPV professional degree programme in Heritage Conservation. His fields of research are the history of painting materials, paper conservation and conservation theory. He has published several monographs and articles on these subjects.
