Good charactor development. once in the book, the author pulls a number of issues into the story and subject matter to let the reader determine his or her beliefs for the charactors. there are some twists and turns, but the ending will surprise you. this is a book that will get you thinking and looking at subjects in a different light.0 of 0 people found the following review

helpful. A Very Rewarding Experience  
By Matthew J Vince  
I am not a writor. I am not a literary editer. Nor am I perfect. To create something grand, one collaborates. Whether building a sculpture where one could hire sketch artists to welders, or making a movie where one could hire writers, actors, cameramen, editor, to colorists; one could easily get lost or frustrated in creating ones vision. True one could do all of these things by theirselves; and that is my point. When creating something monumental, all by ones self, many errors, blunders, and faults can occur very easily. Take these 400 or so pages for example. What I am trying to bring to light with this piece of work is to set aside potential obstacles and just focus on creation. Make art. Make music. Make something. Dont whine and dwell on the ifs. Just create and shape it into the best piece it possibly can. Make it only for you. Create, the best that one can, do not over worry about technicalities. It may not be perfect, but I created this book. I am proud to showcase this in all its mistaken, creative glory

This is a book. There are lots of letters that the author uses to form words. The words CULMINATE into a sentence, which the author also constructs. The paragraphs also are there. I have friends.

A prolific epidemic quickly spreads as it leaves the entire nation torn. The pandemic; people are seperating into multiple versions of each other. Why has this new form of creation of life come into existence? At first, the new formation of life promises a noble and exciting future, but with the population of the world doubling every day, global panic increases faster than the world's inhabitants. With no more room on earth, the planet must unite to find a possible way to stop individual detachment and control the panic before life as we know it ceases to exist.
