Making Classic Carved Furniture: The Queen Anne Stool

Ron Clarkson : Making Classic Carved Furniture: The Queen Anne Stool before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Classic Carved Furniture: The Queen Anne Stool:

0 of 0 people found the following review helpful. I haven't made one yet, but...By Cody JohnsonThis book makes me feel like I could really build this, even as only a beginner to intermediate woodworker. I've not seen a better detailed woodworking instructional book. The photos and explanations are amazing. I highly recommend it.7 of 7 people found the following review helpful. Great intro to fine woodworking and carving furniture!By RobertgRon takes you through every step in idiot-proof detail assuring sucess to anyone capable of following instructions and mildly skilled with tools. This book along with his two others, Making a Pie Crust Tea Table and Making a Chippendale Chair are a must for anyone serious about making 18th Century furniture reproductions.

Tom Heller and Ron Clarkson share their techniques and expertise with the reader, going step by step through the process of making a carved Queen Anne foot stool. While complete instructions are given, the emphasis is on the

beautiful carving that added such elegance to period furniture. The readers will learn which carving tools to use and how to apply them to this project. They will be able to follow the measured drawings of the project, and will be aided by the full-sized detailed drawings and the ample photography. Tom and Ron have covered every aspect so the readers can execute their own "works of art." From cutting out the stock to applying the finish, no process has been left out. After finishing the project, the reader will be able to apply the knowledge gained here to other furniture. A gallery in the back shows some of those applications. This is truly a book to be owned and enjoyed by anyone who enjoys working with wood and creating beautiful pieces of furniture.
