Emergency vehicles! There are many books out there covering diecast models from certain makers but only a few that focus specifically on Fire, EMS and emergency models. I've gotten all three of his books so far and given the caliber of their quality and content they sit on the shelf next to my book on emergency diecast by Dr. Edward Force. These new books will be excellent references for years to come and I can't wait for the next in the series! 0 of 0 people found the following review helpful. Outstanding guide on Conrad Fire Truck models !By bobI have been collecting model fire trucks for 47 years. I have had several Conrad pieces in my collection and now I have a full color reference guide in this book. It is truly awesome. The book has great pictures and references the years the models were made. I am very pleased with the purchase of this book and I have ordered the other 2 that are available as well. 0 of 0 people found the following review helpful. Five StarsBy Steven BrodyExcellent reference guide. Great photos. Looking forward to future releases.

Explore the exciting world of miniature die-cast model fire engines in full color. In this guide author and long-time collector Andrew Benzie presents his collection of over 40 die-cast emergency vehicles produced by Conrad (Germany) between 1979 and 2017. Each model has been individually photographed and is presented in full color. Catalog number, year produced and scale information is provided for each listing, and photos of model boxes and catalogs are also included. This wonderfully designed reference book will appeal to collectors, firefighters and children alike. 43 models, 56 pages, full color

About the Author Author Andrew Benzie began collecting model emergency vehicles in the 1970s when his grandparents gave him his first Corgi and Dinky toy fire engines. Andrew currently lives in the San Francisco Bay Area where he runs a design and book publishing company, and plays bass and drums with several local bands.
