Mary begins this book with a "How to Use This Book" section, and explains "That this book is strictly a textbook and should be used as such". (I have never sat down and read this book form cover to cover, but have went to the index and

looked up what I was in need of knowing and paged to that area). The book starts out talking about the types of looms and choosing a loom and parts of a loom. The next chapter covers winding a warp (paddle, board reel), dressing the loom (f-b, b-f and the beriau method).
